Single Tenant Bungalow

- Supporting independence
- Creating a home for life

In partnership with:

Background

Working with Oxfordshire County Council and the care provider, we transformed an existing property into specialist supported accommodation for a resident with complex needs whose previous placements had broken down several times over four years. Through carefully planned adaptations and bespoke design features, we created a safe, secure home tailored to the resident's needs. Since moving in, the placement has remained stable, with reduced care costs and an environment that supports appropriate care and greater independence.

Creating a
home for life

Bathrooms & Wet Rooms

- Specialist wet room designed around the resident's individual needs.
- Practical adaptations to support accessibility and safety.
- Fixtures and fittings to meet the specific requirements.

Kitchen

- High quality fitted kitchens.
- Solid worktops throughout.
- Secure, robust fittings to support safe and practical everyday use.

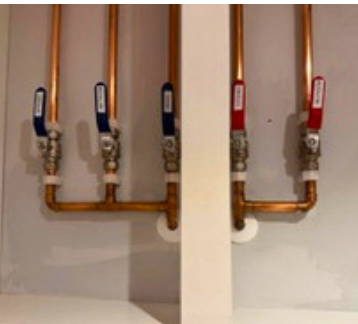

Development Approach

The development involved extensive property adaptations designed around the resident's individual requirements. Working collaboratively with the local authority and care provider, we incorporated specialist safety features while maintaining a practical and welcoming living environment.

Works included reinforced acoustic fencing, a durable all-weather garden surface, widened hallways and doorways, and secure fixtures and fittings throughout. Additional adaptations included protected radiators, flush-fitting electrical fittings, a specialist wet room, reinforced window screens and integrated blinds. Key system controls were located within the staff area to support the property's specific operational requirements.

The completed home provides a safe, secure environment tailored to the resident's needs, supporting a stable placement and the effective delivery of care.

Working in Partnership

Through strong partnerships with local authorities, commissioners and support providers, we deliver high-quality homes designed to meet individual needs, support independence and provide safe, comfortable living environments.
